PROFILE

Software Engineer with professional experience in software development and a strong foundation in IT support, networking, cybersecurity, and systems troubleshooting. Experienced in working with technical teams, resolving technical issues, managing systems, and adapting to new technologies. Strong communication, problem-solving, organization, and user-support skills developed through professional experience and training in cybersecurity, networking, IT automation, and virtual assistance. Interested in applying these skills to support secure, reliable, and efficient IT operations

WORK EXPERIENCE

AMALITECH

March-July 2026

Backend Software Engineer

- Worked in a collaborative Agile team developing software services.
- Participated in debugging and root cause analysis of software issues.
- Supported the testing and troubleshooting APIs, ensuring reliable data flow between systems.
